General Boat Description

LLC Yacht located at the Marriott Marquis Downtown Marina!

Here She Is! This is the one that won’t let the “Big One" get away! Long Range West Coast Sportfisherman with almost 700 more gallons of fuel capacity (2,170) than the stock 1,500 gallons. That\'s not the only thing that dwarfs any comparable 64 footers. Her broad 19.5’ beam translates into an oversized 3 ensuite stateroom interior layout with a tiered galley. A circular settee overlooking the salon and lanai level extends a few steps down to her 210 square foot cockpit. Heading up from the lanai, there is the custom glassed-in and air conditioned wrap-around helm featuring another comfortable settee. Even higher still, is the flying bridge which boasts the highest spot and the best view at the Marriott Marquis Marina in Downtown San Diego. With a possible slip transfer, the spectacular views of Downtown San Diego, Sea Port Village, San Diego Bay, and Coronado Island will be yours.

Equipped with two well maintained Caterpillar Engines in a walk-around engine room. Not only does this beauty have the three interior staterooms, this 64’ Mikelson boasts a full Captain\'s Quarters with head and additional on-deck head. She is ready to depart to offshore fishing waters or a luxury cruise from the San Juan Islands to Mexico. Nicely equipped with stabilizers… She is a luxurious ride!

Manufacturers Description

The Mikelson 64 Sportfisher is a long-range yacht that\'s 64 feet, 9 inches long with a 19-foot, 5-inch beam and a 5-foot draft. Mikelson Yachts builds a limited number of semi-custom yachts for a select group of buyers. Tom Fexas, one of the world\'s finest naval architects, was chosen to design the Mikelson line. In a search for the best builders, Mikelson has selected builders in the United States, Taiwan, and Brazil. Mikelson\'s long history with each of these yacht builders assures the client of precise results, and a timely, on-schedule completion date. Mikelson Yachts has the experience to choose better methods, materials, and components to assure the yacht\'s maximum reliability and

longevity. While quality construction is the priority, construction costs are also considered to provide the best possible value. Mikelson draws on client expertise for innovative ideas often overlooked by design teams who don\'t use the products they design. Clients are encouraged to visit their yachts during construction and are welcome to have a marine surveyor inspect the yacht. Some Mikelson models can be built by payment of Letter of Credit at the completion of factory construction, saving construction interest costs normally associated with semi-custom yacht construction.
